EuroBond D3 Floating Floor Glue

Mohawk recommends Cal-Flor's Eurobond D3 floating floor tongue and groove glue for floating our NON Uniclic engineered hardwood floors. Eurobond can be added to Uniclic glueless products for added strength and moisture resistance.

Eurobond D3 stays flexible while forming a watertight bond. The first American-manufactured, D3-certified adhesive for use when installing a click or T&G floor, EuroBond D3 is certified to meet and exceed tough European D3 standards. This specially formulated glue is designed for high strength flexibility and is far more effective against water damage than any other glues.

Retailer Advantages

- Specially designed, high strength, flexible, cross linking formula
- Perfect for high moisture areas such as kitchen
- Exceeds the European D3 standards
- European D3 Certified
- Made in the U.S.A.
