The floor must be installed properly in accordance with Mohawk installation instructions. The instructions should be obtained through a retailer or at 1-888-387-9881 or www.mohawkflooring.com. Proper installation includes, but is not limited to, the following:

- A moisture test must be performed to determine if excessive moisture exists in the subfloor.
- When using a calcium chloride moisture test for concrete subfloors (ASTM F1869), values must be ≤ 5 lbs./1000ft²/24hr or $<80\%$ RH with an in- situ probe (ASTM F2170).
- A polyethylene film vapor barrier must be used over concrete subfloors.
- A polyethylene film vapor barrier is not required over wood subfloors. Moisture readings of wood subfloors must be $\leq 12\%$ throughout the entire installation.
- Install over a single layer of underlayment appropriate for wood floors.

- Make sure to follow the underlayment installation instructions, taking special care to seal all foam edges with sealing tape and repair all rips and perforations in the underlayment vapor barrier prior to flooring installation. A separate vapor barrier should not be used in conjunction with Mohawk Platinum Underlayment.
 - The entire perimeter of the installation must be sealed with the waterproof quarter round for WetProtect or 100% silicone sealant in accordance with the installation instructions. For sections where the WetProtect molding system cannot be used, seal the perimeter with 100% silicone sealant. All expansion spaces must be filled with 3/8" compressible PE foam backer rod and covered with 100% silicone sealant. Apply 100% silicone sealant to all moldings at the point of contact with the flooring surface. Apply silicone sealant at all connections to doorframes or any other fixed objects.
 - When installing Mohawk in special situation areas such as terrazzo, pier and beam or radiant heating, and to also learn how to properly acclimate your floor, please contact our consumer help line at 1-888-387-9881 or log on to www.mohawkflooring.com to obtain important additional information.
 - Failure to fully engage the locking system around all sides of each plank during installation could result in gaps that will void this limited warranty.
2. The flooring must be used only indoors in a dry, climate-controlled area.
 3. The flooring must be maintained in accordance with Mohawk care and maintenance instructions. Damage resulting from excessively wet maintenance or from using detergents, abrasive cleaners, soaps, waxes or polishes is not covered by this limited warranty.

 7. These limited warranties do not apply to damage caused by water or moisture in the subfloor or underneath the flooring, including but not limited to damage from subfloor hydrostatic pressure (water or moisture under the floor that is transmitted to the surface through exerted pressure) or other conditions that result in water or moisture being below the floor.
 8. These limited warranties do not apply to flooring installed on concrete subfloor unless a non-recycled (100% virgin resin) 6-mil polyethylene film vapor barrier with a density of 0.92 lbs/cubic foot and a thickness tolerance of +/- 10% is installed over the concrete subfloor with water vapor emissions no greater than 5 lbs./1000²/24-hr. or ≤ 80% RH with an in-situ probe (ASTM F2170). Care and Cleaning

Place felt floor protectors under the legs of moveable furniture. Chair casters should be rubber — not plastic or metal. Place walk-off mats at entrances. Dust mop as primary cleaning method. Occasionally wet mop with water only, using a well wrung out mop; DO NOT pour liquid directly on floor or use an excessively wet mop that will puddle or leave moisture standing on the floor. If needed, use 1 cup of vinegar per gallon of water OR 1/3 cup non-sudsing ammonia per gallon of water. DO NOT use detergents, abrasive cleaners, soaps, waxes or polishes. A residential steam mop may be used provided the steam is applied to a microfiber pad and not applied directly to the floor. Make sure to set the temperature of the steam mop to the appropriate setting for wood floors, or to the lowest setting. Steam mop in the length direction of the planks only. Use correct hard surface vacuum tools. DO NOT use rotating beater bars, floor scrubbers, jet mops, buffers or similar products. Wipe up spills immediately. DO NOT allow topical moisture to remain on the floor longer than necessary.
